The image shows a screenshot of the Eclipse IDE interface. The top menu bar includes File, Edit, Source, Refactor, Navigate, Search, Project, Run, Window, and Help. The Project Explorer on the left shows a project named 'com.myTraining.core.services' with sub-packages like 'CustomConfig', 'CustomServices', 'SimpleServiceImpl', and 'com.myTraining.core.servlets'. The 'com.myTraining.core.servlets' package is expanded, showing 'PageSQLIndexSearchServlet.java' selected. The Outline view on the right shows the 'PageSQLIndexSearchServlet' class. The main editor window displays the code for 'PageSQLIndexSearchServlet', which is a SlingSafeMethodsServlet. The code includes imports for JSON, logging, servlets, and Sling. The 'doGet' method is implemented to search for pages based on a text parameter. The bottom of the IDE features a 'Problems' view showing 6,625 errors, 40 warnings, and 2 others. The status bar at the very bottom indicates 'Writable', 'Smart Insert', and the cursor position '57 : 1 : 2210'. The system tray at the bottom right shows the date and time as '11-03-2025 20:31'.
