Author Portfolio Website Development

Adobe Experience Manager (AEM) Implementation

Presented by: Thasaratha Pranav K

Department of CSE

Problem Statement

- Develop an Author Portfolio Website with essential pages like Home, Books, About Me, and Contact Me, ensuring interactive components and structured content organization using AEM.

Project Overview

- **Objective**: Develop an interactive Author Portfolio Website using AEM.

- **Key Features:**

- Stylish Header and Footer using OOTB Components.

- Engaging Home Page with Award Teaser Component.

- Books Page with Dynamic Book Cards.

- Dedicated About Me and Contact Me Pages.

- Technologies Used: Adobe Experience Manager (AEM).

Header & Footer

Header:

- Utilize OOTB Header Component.
- Add Navigation Tabs: Home, Books (Dropdown), About Me, Contact Me.
- Ensure Proper Styling for Better Visual Appeal.

Footer:

- About Me
- Contact Me
- Books List with Hyperlinks (Open in New Tab)
- Social Media Links

Header & Footer

Home Page Design

- Use the Teaser Component to Showcase Award Ceremony Details.
- Include:
- • Image
- • Title
- • Description
- • CTA Link (Leads to Award Detail Page)
- Include 5-6 Components Such as Text, Image, Title, or Teaser Components.

Home Page Design
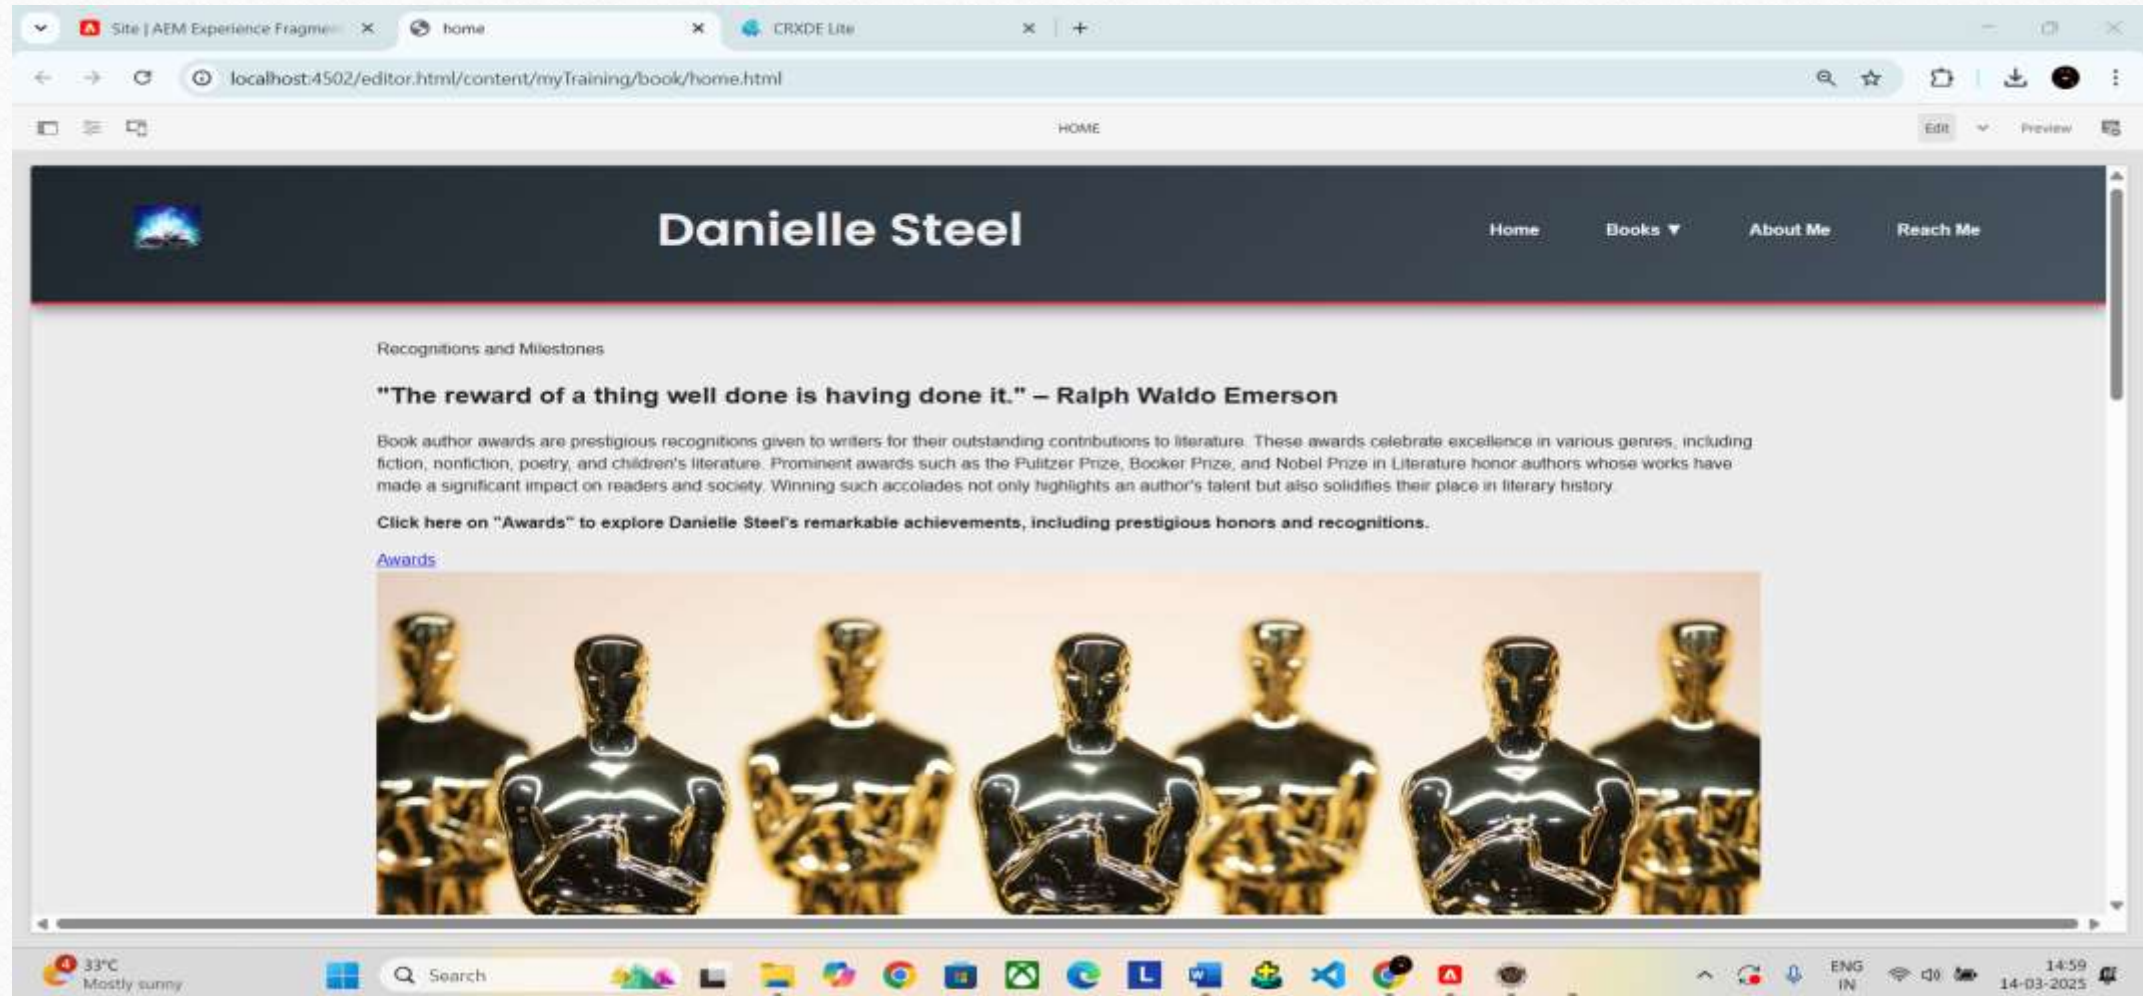

Books Page Implementation

- Create a Custom Book Component.
- Book Component Features:
- Accepts Parent Path to Fetch Book Pages.
- Displays Books Authored Under /content/books/.
- Book Card Details:
- Title
- Description
- Image

Books Page Implementation

About Me & Contact Me Pages

- **About Me Page:**
- Used Custom Author Component for Author Information.

- **Contact Me Page:**
- Used Text or Teaser Components to Display:
- Contact Information
- Social Media Profile Links

About Me

Contact Me Pages
